DETAILED ACTION

Response to Amendment

1. Claims 1-24 are pending in this application and have been examined.

Response to Arguments

2. Applicant's arguments filed March 19, 2002 have been fully considered but they are not persuasive.

In response to the applicant's arguments concerning claims 1, 23, and 24, the '919 Patent discloses downloading of information (content) in the abstract in "page" form. As mentioned in col. 1 line 25, "...a page frame consists of (useable) data..." Therefore the '919 Patent does teach the "information download" of the applicant's claims.

The integrity check value of the '919 Patent is used to allow access to the returning page data in col. 3 lines 1-20 and therefore does teach the access control predicate of the applicant. Page data cannot be accessed, i.e., downloaded to secure RAM memory unless an access control predicate is satisfied, i.e., the ICV value comparison results in a match.

In response to the applicant's argument concerning claim 14, the random number generator of the '919 Patent is taught as having a 32 bit output register (col. 4 lines 15-25) where the generated random values are accumulated before being read out. A register of this type does represent a "computer-readable" medium.

The storage keys of the '919 Patent are based on an identity for the operating system as taught in col. 3 lines 9-32 where the encryption decryption functions are taught as being

Art Unit: 2132

implemented in software (operating system for the processor) as an alternative embodiment.

Additionally, an encryption algorithm embodied in software does represent a processor operating system for the type of dedicated processor taught in the '919 Patent.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. The changes made to the language of the claims in the amendment received March 19, 2002 do not require any changes to be made to the rejection of them (i.e., claims 1, 2, 5, 13, 14, 23, and 24 under 35 U.S.C. 102(b) as being clearly anticipated by Herbert, US Patent 5,757,919. Therefore the rejections will not be repeated herein but instead are incorporated by reference to the previous Office Action in the case. The Applicant is referred to the previous Office Action in the case for the text of these rejections.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2132

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
